Lab Assignment – 3

Name – B Pravena

Section - B

SRN – PES2UG19CS076

Identify the use cases and actors and their relationships for Passport Automation System and depict it with a Use Case diagram:

The actors in the Passport Automation System are Applicant, Police, Passport Administrator and Regional Administrator.

The **Applicant** can Login, submit their personal details, pay online for the application, view their application status or also apply for ECNR status.

The **Police** can login to the system, get details of the applicant, verify applicant's residential address and other details and then store the verification.

The **Passport Administrator** can get details of the applicant, verify it, store the verification and then if successful can issue the passport.

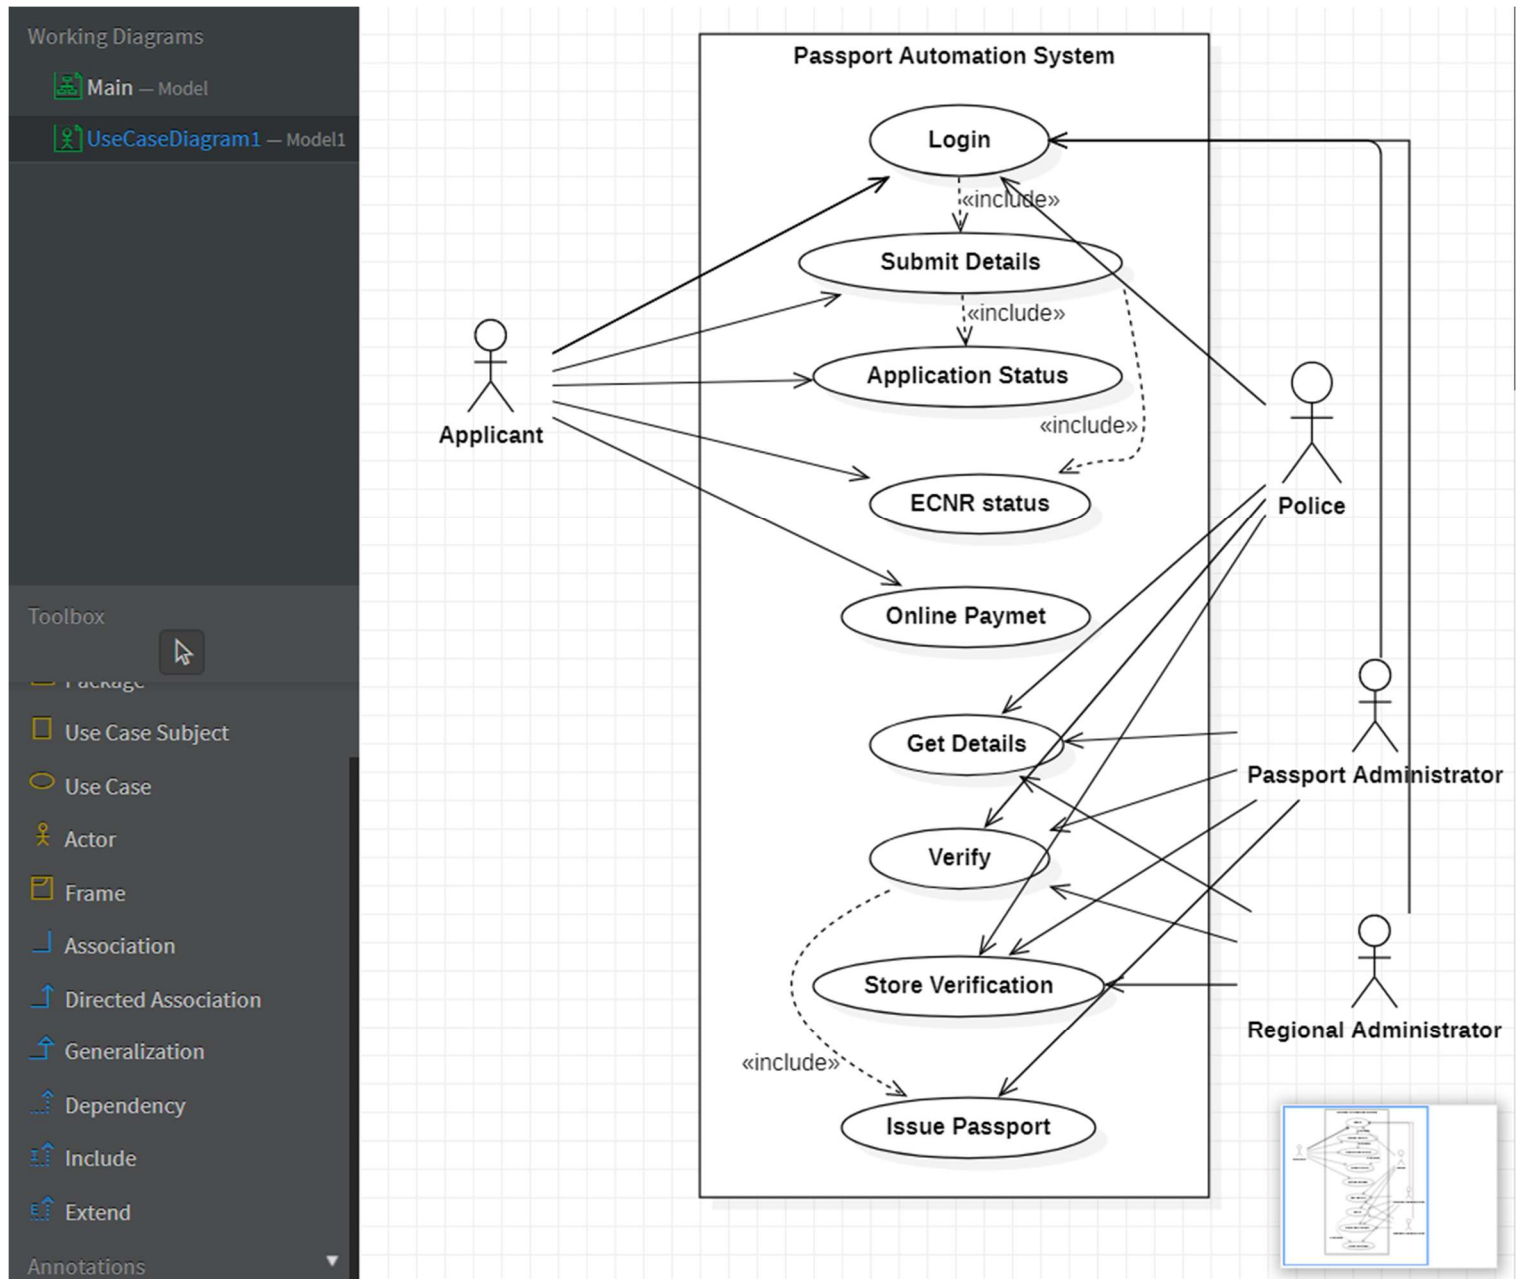

The **Regional Administrator** can get the details of the applicant, verify it and then can give confirmation to issue the passport.

Relationships -:

INCLUDE type -: Submit details can be done only after logging in. Application Status as well as ECNR status (optional for the applicant) can be viewed only after submitting the details. Only after verifying the applicant's details, the passport will be issued.

NOTE -: INCLUDED case cannot stand alone without the BASE case.
